MODIFIED HMS Karabiner
K30TA-ANSI-PCxx Range

Product Description

Usually steel karabiners are zinc plated gold/yellow to meet the Standards requirements for corrosion resistance. Its actually very difficult to paint them bright colours as the temperature involved with powder coating significantly affects the zinc plate. AHL has worked with a specialist company to develop an extremely tough undercoat (it's the black coating) over which powder coat can be applied without compromising the corrosion resistance. Therefore, steel karabiners can now be custom powder coated according to most RAL colour schemes.

Product Information	**K30TA**
Weight 350g	**Gate Type** Triple Action
Dimensions 130mm x 91mm	**Gate Opening** 24mm
MBS 50kN	**Finish** Red / Green Powder Coat*
MBS (Choker Hitch) 40kN	
Proof Loaded 16kN	

*Other colours available on special order. MOQs apply.
